IT'S "ROOTS" THAT COUNT

OUR MESSAGE TO YOU

In this, our 1931 catalog, you will find a number of things that we believe will be of interest to you. You will find listed a number of new items which seem valuable and all of the old varieties that are interesting and worthwhile.

For 36 years we have endeavored to give the best of quality, both in material and service, and it has brought us increased success. Our aim and standard is as high as ever in this respect. While quality is regarded first in all our departments, from production to complete landscape service, yet we wish to call your attention to a reduction of prices on a large number of items we are offering. This is made possible through scientific care and management in our production departments.

We wish to call your attention to the illustrations in this catalog, which contains a few of the many homes in various parts of this section of the country planted by our Landscape Department. In this department we offer complete service, from Rock Gardens to Outdoor Living Rooms and Foundation Plantings.

In 1932 there will be a Bi-centennial celebration of the birth of George Washington. In connection with this Anniversary, millions of trees will be planted this year in memory of the "Father of Our Country," by individuals and groups. Everyone doing this will receive a certificate and become a member of the American Tree Association, Washington, D. C. Write to the above for full information.

Entrance to our office and sales grounds.

AN INVITATION TO VISIT OUR NURSERIES

We invite everyone interested in trees and plants to visit our Nurseries, which are conveniently located on Route 72, or the Lancaster-Manheim-Lebanon Highway, which passes through our Nurseries.

Whether you are traveling South from Manheim or North from East Petersburg on this road, you cannot miss our signs placed on the side to the East. After you see one of these signs you will be directed by other signs to the office and sales grounds.

If you are not acquainted with the location of our Nurseries, a little study of the above map will help you to get to us very easily. There will be someone in attendance during daylight hours on week days.

No business transacted on Sundays.

EVERGREENS

One of the approaches to our office and sales grounds.

These Evergreens have been transplanted frequently. Each time they have been given ample room for proper growth and are sheared each season into a symmetrical shape. They are freshly dug in the nursery for your individual order, balled and burlapped.

Most of the following varieties (including Mugho Pine) may be trimmed and used for Foundation planting, etc. However, the Abies or Firs, the Piceas or Spruces, and the Pinus or Pines grow large and should be used for specimens, screens or for massing where there is plenty of room for them to develop.

LIGUSTRUM—PRIVET

Ligustrum ovalifolium, 9'-10' **CALIFORNIA PRIVET**

The most popular hedge plant on account of its beauty, adaptability, and low cost.

To find the exact number wanted, measure the space where it is to be planted and multiply the number of feet by two. They should be planted 3 inches deeper than they stood in the nursery row. Set the plants 6 inches apart in the row. Dip the roots in water before planting. After plants are set, cut them down to 4 inches from the surface of the ground. This will cause a thick new growth to start and is very essential for a beautiful hedge.

When cutting, each time allow about 1 to 2 inches above where it was cut before, until you get the height desired.

Two-year—cut back and well branched. Will give immediate effect.

ROSES

The varieties we offer are very popular and are adapted to be most satisfactory and pleasing.

The potted plants can be set out late in the season, but we also offer for early orders only, the same quality field grown roses unpotted at the lower prices listed. Both kinds will bloom this year.

How To Grow Roses, by Pyle, McFarland, and Stevens. Full and practical information on every question on the growing of garden roses. Written from the life-time experience of three of our greatest growers. 45 varieties are illustrated in full color. The best book on roses ever published. 138 illustrations, 211 pages.....\$2.00

EVERBLOOMING AND HYBRID TEA ROSES

Betty Uprichard. Brilliant copper-red buds and semi-double salmon-pink flowers stained with copper-pink on the outside.

Duchess of Wellington. Intense saffron-yellow, stained rich crimson.

Frau Karl Druschki. Constant bloomer. Best white.

Gruss an Teplitz. Everblooming scarlet crimson. A strong grower. The best everbloomer of its color.

Jonkheer J. L. Mock. Outside of petals deep pink, inside silvery rose.

Lady Ashtown. Brilliant glossy pink, flowers of exquisite pointed shape.

Margaret McGredy. Brilliant red petals on hinges of deep gold. Buds upright. Seldom out of bloom.

Mme. Butterfly. Bright pink, apricot, and gold.

Mrs. Aaron Ward. Yellow, sometimes shaded salmon and rose.

Ophelia. Salmon-flesh, shaded rose. A rose that is admired by everyone.

Padre. Copper-scarlet, yellow at base of petals; semi-double.

Radiance. Lovely light silvery pink flowers, with beautiful suffusion of deeper color. It may be relied upon to produce flowers under all conditions.

Red Radiance. A deep red, with great globular flowers. Blooms until frost.

Souv. de Claudius Pernet. Color a decided and unstained sunflower yellow, even deeper toned at center. Will not fade. Flower form is large and full, the buds long and pointed. Vigorous grower.

Willowmere. Shrimp-pink, wonderful long-pointed buds. The rose to plant where Los Angeles does not succeed.

CANNAS

Cannas for Color

For a flaming, gorgeous color effect, give us Cannas. They outshine most other plants, yet they are never gaudy. In beds they are extremely effective.

HOW TO MAKE A ROUND CANNA BED

Plant 1 Canna in the center, 6 in the first circle, 12 in the second circle, then 18, 24, etc., according to the size of the bed, with the circles 18 inches apart, and the plants in the circle 18 inches apart. A bed 4 feet in diameter takes 7 Cannas a 7-foot bed, 19 Cannas; a 10-foot bed, 37 Cannas; a 16-foot bed, 91 Cannas.

The President. 4 ft. Far and away superior to any other scarlet Canna ever produced. This beauty, with its massive heads of glowing scarlet, is in a class by itself for brilliant effect and is used by practically every park superintendent who needs a vivid red in his plantings.

King Humbert. 4 ft. Flower orange-scarlet, streaked crimson. Foliage ebony. Its unusually handsome foliage, which is equaled by no other variety, makes this Canna as popular as is the President for its gorgeous flowers.

King Midas. 4 ft. Very large, beautifully formed, firm flowers of glittering golden yellow.

Victory. 3 ft. The throat of the flower is glowing apricot, which shades to a suffusion of pinkish-buff or summer sunset tints over the petals, finally edging off to a distinct border of maize-yellow. Flowers are medium in size.

APPLES

Apple trees should be set 32 to 40 feet apart.

Fillers. Most commercial orchards are now planted with standard varieties, 40 feet apart each way. Quick, upright growing, early maturing varieties are used as fillers, planting between standards to make 20 ft. apart; fillers to be removed when the standard trees require the room (12 to 18 years). This requires 28 standard and 82 fillers to the acre. **We recommend for fillers:** Yellow Transparent, Oldenburg, Grimes Golden, McIntosh and Wealthy, or peach trees.

SUMMER APPLES

Benoni. Attractive, red, best eating apple of its season. Early bearer and very productive.

Early Harvest. Medium, pale yellow, tender, juicy.

Oldenburg (Duchess of Oldenburg). Good size, yellow, streaked red, juicy, sub-acid, productive.

Summer Rambo. Very large; flesh yellow, firm, tender, very juicy, mild sub-acid.

Red Astrachan. Large, beautiful deep crimson. A favorite eating and cooking apple.

Yellow Transparent. Earliest and best; white, tender, juicy, sprightly, sub-acid. Grows rapidly, bears young, and makes a profitable "filler."

AUTUMN APPLES

Gravenstein. Large striped, fine quality, one of the best fall sorts.

Maiden Blush. Large, beautiful, blush cheek.

Smokehouse. An old favorite, originated in Lancaster Co., Pa.

Wealthy. Medium size, smooth, round, deep red; handsome and of fine quality.

WINTER APPLES

Baldwin. Red, large, fine quality, tree vigorous.

Winter Banana. Size large, golden yellow with bright crimson red.

Cortland. This is a promising new variety originated at the Horticultural Experimental Farms, Geneva, N. Y. The fruit is medium to large in size, of a bright red color. Flesh is pure white.

Delicious. Red and yellow; fine grained, and quite juicy; flavor slightly acid, but very good.

Falawater (sometimes called **Pound Apple**). Large; yellowish green fruit.

Grimes Golden. No orchard complete without it. Yellow, best quality and productive. For either home or market for this season there is nothing better.

Hubbardston. Large, red, striped, tender, juicy.

Jonathan. Medium; red, extra quality.

McIntosh. Large, deep crimson, highest quality, juicy, sub-acid.

Paradise Winter Sweet. Large; creamy, rosy-cheeked.

Rome Beauty. Large, yellow, shaded red; tender, juicy, sub-acid.

Stark. Large, striped light and red, juicy, mild, sub-acid. An early and abundant bearer, good keeper.

Stayman Winesap. Of the several important descendants of Winesap, this variety is leaping into prominence as a splendid sort for the home or commercial orchard. The tree is a sturdy grower and a very heavy producer. It is adapted to a wide range of soils and climates, thriving almost wherever planted. It runs to large sizes. The fruit is of deep red color, with firm flesh, tender, juicy, and the same rich flavor of the parent. We strongly recommend this variety for the home or commercial orchard.

York Imperial. Medium to large; yellow, shaded red; firm, juicy, sub-acid.

CRAB APPLES

Hyslop. Large; deep crimson; one of the most beautiful; very popular.

Transcendent. For many years the most popular crab apple. Fruit about an inch in diameter, yellow, with red cheek.

PEACHES

We are offering only a limited number of varieties, ones that you can depend on giving you a good crop of fruit. We do not think it worth while to propagate a large number of varieties, when a few of the best will make more money for our customers. The peach crop is quite sure if you give your trees proper attention.

ARRANGED IN ORDER OF RIPENING

Greensboro. The very best extra early commercial sort. Hardy and productive, fruit large and tree healthy. Color white with crimson cheek.

Carman. White with red blush. Carman is extra hardy, bears every year, and when it fails all else fails too. Tree a very robust grower and produces heavily.

Hiley (Early Belle). The earliest commercial white free-stone peach. It resembles Belle of Georgia, but in quality is superior to most of its white-fleshed competitors. The pretty red cheek and good shipping qualities make it very popular for early market.

Champion. Large variety, creamy white, red cheek, sweet, rich and juicy. Hardy and productive.

Belle (Belle of Georgia). Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific.

Capt. Ede. A handsome yellow peach of excellent quality: hardy in bud and blossom.

J. H. Hale. Probably no new peach has ever been introduced claiming to be so much superior in all ways. It averages one-third to one-half larger than Elberta, ripens about five days earlier and is much superior in flavor. Color a beautiful golden-yellow with deep carmine blush.

Elberta. Large, yellow, with red cheek; flesh yellow, firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. The leading market variety.

Late Crawford. A superb, large, yellow peach.

Mathews (Dr. Funk's strain). Very similar to Elberta but of better quality.

Old Mixon Free. Large, pale yellow, deep red cheek, white flesh, tender, rich, good.

Stump. Large, white, bright red cheek.

Salway. A late yellow variety. Latter part of September.

Iron Mountain. Ripens September 15 to October 1. Fruit is of large size; color, white.

SWEET CHERRIES

- Bing.** Very large, dark brown—almost black; flesh firm, sweet, rich and delicious. One of the most profitable sorts. July.
- Black Tartarian.** Very large, black, juicy. Last of June.
- Gov. Wood.** Large, light red, juicy, rich, delicious. Tree healthy and productive. June.
- Napoleon.** Large, pale yellow or red; firm, juicy, sweet and productive. July.
- Schmidt.** Immense size, deep black; flesh dark, tender, very juicy, fine flavor; productive. July.
- Windsor.** Fruit large, liver-colored, distinct; flesh remarkably firm and of fine quality. Tree hardy and prolific. A valuable late variety. July.
- Yellow Spanish.** Large, yellow and red. June.

SOUR CHERRIES

- Early Richmond.** Medium, dark red, melting, juicy, sprightly, rich acid.
- English Morello.** Fair size, blackish red, rich acid.
- Montmorency.** Large, deep cherry-red, very tender and juicy. It is the best variety for home and market. It ripens at the close of the Early Richmond season, and is of better size than that variety; more meaty and of richer flavor.

- Abundance.** One of the oldest and best varieties; hardy, productive. Fruit large, lemon yellow, with heavy bloom; good quality. August.
- Burbank.** Most profitable among growers for market. Ripens 10 days after Abundance. Tree hardy.

ROOT'S NURSERIES, INC.

- October Purple.** A strong, vigorous grower, hardy, productive, of good quality, a large, round, late purple plum, especially recommended for late market.
- Red June.** One of the vigorous, upright growers; productive; fair size, vermilion red; pleasant quality. Ripens a week before Abundance. August.
- Climax.** One of the best of the large, early sweet plums, ripening ahead of other varieties, which makes it a very valuable market sort. July.
- Gold.** Large, oval, bright yellow; rich, juicy, fine quality. A good grower.
- Bradshaw.** A very large and fine early plum, dark violet-red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. Middle of August.
- German Prune.** Large, dark purple, sweet, good. One of the most popular for canning, because of its sweetness. September.
- Italian Prune.** Good size, purple, juicy, delicious, fine for drying. September.
- Imperial Gage.** Large, pale green, juicy, sweet, rich, and excellent. August.
- Satsuma (Blood).** Large, globular, with sharp point. Color purple and red with blue bloom; flesh firm, juicy, dark red or blood color, fine quality; pit very small. Hardy and vigorous grower. August.

BloomAid

For Flowers / Shrubs / Vegetables

BloomAid is *easy to use*, indoors or out. A tablet or two, or a spoonful of liquid BloomAid in a glass of water—either is enough for a potted plant, now and then. For window boxes, porch boxes, and the flats where the seedlings grow, use granulated BloomAid from a shaker-top pound can or by the spoonful from a five-pound can. Outdoors, in the beds and among the shrubbery and around the hedge, use granulated BloomAid from bags. Full directions with every package.

INSTRUCTIONS TO PURCHASERS

How to Figure Your Order. One to four trees or plants of one variety sold at the each rate; 5 to 25 of one variety at the ten rate; 25 to 250 of one variety at the 100 rate; 250 or more at the 1000 rate.

Orders. Orders should be sent in just as soon as possible after receiving catalog. By placing orders early you are more certain of getting the varieties wanted, as late in the season we are often sold out of some of the varieties. If ordered early we can reserve the stock until you want it shipped.

Shipping. We have the Pennsylvania and Reading Railroads and the Lancaster Trolley system, and can ship in any direction with the probability of prompt arrival at destination. All shipments travel at the cost and risk of the purchaser.

Truck Deliveries. Truck load orders will be delivered free, reasonable distances; long hauls and smaller orders delivered by special arrangement. We are well equipped to give good truck service.

Guarantee. We guarantee all stock to be strictly first class and true to name and will upon proper proof refund the purchase price, or replace any stock which proves otherwise. It is understood and agreed that we will not be held responsible for any greater sum than the cost of the stock, should any prove untrue. We strive to avoid mistakes and believe that we are as exact as any in the business.

Our nurseries are inspected every year and every shipment will be accompanied by a Certificate of the State Examiner.

Replacements. We guarantee all stock we sell to be strictly first class and TRUE TO NAME, dug and packed properly for shipment. We do not charge a price for a tree that, should it die, we could replace it and then still make a profit. Stock often perishes when it is not properly planted and cultivated; also the severe cold and heavy storms of Winter and droughts of Spring and Summer, which are liable to occur, will sometimes cause the best of stock to perish, which is no fault of ours.

It is impossible for us to guarantee trees and plants to live, as this altogether depends on weather conditions and how stock is planted and cared for after planting. The conditions which prevail after stock leaves our hands are such that it is just as impractical for a Nurseryman to guarantee a tree or plant to live as it would be for your best neighbor to sell you a horse or other live stock and guarantee it to live. We can only guarantee to send you good stock up to grade represented, full of life and true to name.

Terms Cash, except when expressly agreed otherwise.

Substitution. When sold out of a variety of trees or plants we frankly say so, and when you allow us to substitute we will send a variety as good or better and similar to the one ordered. As we know the many varieties, our substitution, if any, will be of advantage. Late in the season we are sometimes sold out of some varieties of stock; thus when sending your order it is to your advantage to say whether we may substitute or not, that we may get the order off promptly, before the season is too far advanced for successful planting. If you do not wish us to exercise this right, please mark your order sheet plainly NO SUBSTITUTION.

Prices. The prices quoted in this catalog are F. O. B. Nurseries, except where otherwise noted.

We do not run a regular agency, but some of our stock is sold to dealers, florists and agents, and we are not responsible for their prices nor for any promises made other than those found in our "Instruction to Purchasers."

SUCCESSFUL PLANTING AND CARE OF STOCK

CARE

The bundles should be opened immediately, the roots dipped in water, then heeled in moist ground so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about them.

When ready to plant, take up only a few at a time, puddle the roots and do not allow them to lie exposed to the sun or air.

The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

PLANTING

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted two or three inches deeper than they stood in the nursery row; *pack the soil very firmly about the roots by tamping with the feet or post tamper*, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry, apply one to two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil.

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

SUITABLE DISTANCE FOR PLANTING

Apples—30 to 40 feet apart each way.

Standard Pears and Cherries—20 feet apart each way.

Plums, Peaches and Apricots—16 to 18 feet apart each way.

Dwarf Pears and Quinces—10 to 12 feet apart each way.

Grapes—rows of 10 to 16 feet apart; 7 to 10 feet in rows.

Currants and Gooseberries—4 feet apart.

Raspberries and Blackberries—3 to 4 by 5 to 7 feet.

Strawberries, for field culture—1 by 3 to 3½ feet.

Strawberries, for garden culture—1 to 2 feet apart.

Asparagus, for field culture—18 to 24 inches by 3½ to 4 feet.

Asparagus, for garden culture—18 to 24 inches apart each way.
